**Distributed Sensor Systems: Practice and Applications** Habib F. Rashvand, Jose M. Alcaraz Calero

**This book focuses on the distinct but tightly inter-related areas of development for distributed sensing systems**

In this book, the authors discuss the technological developments lead by sensor technology, addressing viable new applications to inspire a technological evolution. Under the advanced and visionary approach of distributed intelligence, the authors focus on three distinct but tightly inter-related areas of developments for distributed sensing systems (DSS): firstly, the sensor technology embracing the conversion of the phenomena of interest into desirable form of signal such as electric, secondly, the interaction process between sensing points which requires immense intelligence loosely called networking, and finally, the adoption of useful maturing systems through potential applications for right impacts for a better life and a brighter economy. Furthermore, the book contains a number of case studies and typical applications illustrating the technical details, features and functions of the systems, as well as demonstrating their benefits and limitations.

Key Features:

- Discusses the technological developments lead by sensor technology
- Addresses viable new applications
- Contains a number of case studies and typical applications illustrating the technical details, features and functions of the systems
- Demonstrates the benefits and limitations of distributed sensing
- Written by experts with vast experience in the field (both in academia and industry)

This book will be an invaluable reference for postgraduates studying related courses (communication engineering, engineering management, computer systems, industrial process, automation, design, environmental, urban, surveillance), R&D engineers, system and application designers, researchers, industrial project managers and engineers, and technical and strategic managers planning new products.

**From reader reviews:**

**David Wood:**

As people who live in often the modest era should be update about what going on or facts even knowledge to make all of them keep up with the era that is always change and move forward. Some of you maybe can update themselves by reading books. It is a good choice in your case but the problems coming to you actually is you don't know what kind you should start with. This Distributed Sensor Systems: Practice and Applications is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

**Thelma Brady:**

Your reading 6th sense will not betray a person, why because this Distributed Sensor Systems: Practice and Applications guide written by well-known writer we are excited for well how to make book which might be understand by anyone who read the book. Written inside good manner for you, still dripping wet every ideas and creating skill only for eliminate your hunger then you still uncertainty Distributed Sensor Systems: Practice and Applications as good book but not only by the cover but also with the content. This is one book that can break don't ascertain book by its protect, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your reading sixth sense already alerted you so why you have to listening to one more sixth sense.

**Stella Carpenter:**

You may spend your free time you just read this book this guide. This Distributed Sensor Systems: Practice and Applications is simple to develop you can read it in the playground, in the beach, train as well as soon. If you did not have much space to bring the printed book, you can buy typically the e-book. It is make you quicker to read it. You can save typically the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

**Pearl Young:**

Don't be worry if you are afraid that this book can filled the space in your house, you can have it in e-book method, more simple and reachable. This specific Distributed Sensor Systems: Practice and Applications can give you a lot of buddies because by you checking out this one book you have thing that they don't and make you more like an interesting person. This particular book can be one of one step for you to get success. This publication offer you information that probably your friend doesn't learn, by knowing more than some other make you to be great persons. So , why hesitate? Let's have Distributed Sensor Systems: Practice and Applications.
