Time And Society Warren D. Tenhouten

Time-consciousness long a shared objective of philosophy and social thought is key to understanding different cultures and their cognitive adaptation to one another. Warren D. TenHouten s remarkable book achieves this goal by providing a bold and original three-level theory of time-consciousness, its neurocognitive basis, and social organization. Using classical and contemporary ethnographies of Australian Aborigines and Euro-Australians to support his theory, TenHouten shows how involvement in hedonic sociality emphasizing equality and community leads to time that is cyclical, present oriented, and more generally natural; whereas agonistic sociality based on inequality and agency leads to time that is linear, future oriented, and more generally rational."
