Co-operation, Learning and Co-operative Values: Contemporary issues in education

Co-operation, Learning and Co-operative Values: Contemporary issues in education

The rapidity of change in education has intensified in recent years. With the emergence of 'co-operative schools' and a new framework focusing heavily on co-operation, a direct challenge to ways of thinking about education, at both school and university level, has developed.

Co-operation, Learning and Co-operative *Values* addresses the urgent need to describe, analyse and assess the growth of co-operative education. The relationship between co-operation and education is a complex process and this book critically reflects on the tensions and obstacles facing this movement. It brings together the contributions of academics and practitioners from a range of backgrounds, and explores topics including:

- Theories and histories of co-operative values and principles
- Critical views of the practice of co-operative education
- Case studies of processes in action from both schools and higher education
- Co-operative education in a wider context

This book provides an essential introduction to a new and expanding area of research with chapters by many leading commentators in education. It will be of interest to researchers and educators interested in education and social policy.
