Retroviruses and Disease

Hidesaburo Hanafusa, Abraham Pinter

Retroviruses and Disease Hidesaburo Hanafusa, Abraham Pinter

Retroviruses and Disease presents a relevant summary of the state of knowledge in both human nonhuman retroviruses. It highlights significant concepts regarding their commonalities and differences in terms of retroviral systems. A section of this book covers the pathogenic human retroviruses and focuses on two. These are HTLV-1 (the first human retrovirus that was isolated) and HIV (the cause of a potent immunological disorder).

The life cycle of replication-competent retroviruses, including the murine leukemia viruses and its functions, is discussed in Chapters 1 and 2. The focus of the third chapter is the transformation of Rous sarcoma virus. Meanwhile, Chapter 4 discusses the multiple stages in avian leukosis virus-induced B cell lymphoma. Oncogenes, the molecular basis of human cancer, are also covered in this book. Another virus also discussed in this book is the human T cell leukemia virus.

The book is a good reference for students, teachers, specialists, scientists, and researchers in microbiology.
