We have devised ways to observe it, to predict it, to protect ourselves from it, to take advantage of it. It plays a major role in the science and folklore of every culture. Gary Lockhart's The Weather Companion is a fascinating compendium of meteorological facts and fables, from ancient myths to the latest research, from the rain forests to the desert regions. Gary Lockhart reveals what makes rain "smell," how natural barometers work, and the long history of weather fish, once kept to predict rain, and revived during China's Cultural Revolution.
