Storm Real-time Processing Cookbook Quinton Anderson

In Detail

Storm is a free and open source distributed real-time computation system. Storm makes it easy to reliably process unbounded streams of data, doing for real-time processing what Hadoop did for batch processing. Storm is simple, can be used with any programming language, and is a lot of fun to use!

Storm Real Time Processing Cookbook will have basic to advanced recipes on Storm for real-time computation.

The book begins with setting up the development environment and then teaches log stream processing. This will be followed by real-time payments workflow, distributed RPC, integrating it with other software such as Hadoop and Apache Camel, and more.

Approach

A Cookbook with plenty of practical recipes for different uses of Storm.

Who this book is for

If you are a Java developer with basic knowledge of real-time processing and would like to learn Storm to process unbounded streams of data in real time, then this book is for you.
