RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication

Klaus Finkenzeller

RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication Klaus Finkenzeller

This is the third revised edition of the established and trusted *RFID Handbook*; the most comprehensive introduction to radio frequency identification (RFID) available.

This essential new edition contains information on electronic product code (EPC) and the EPC global network, and explains near-field communication (NFC) in depth. It includes revisions on chapters devoted to the physical principles of RFID systems and microprocessors, and supplies up-to-date details on relevant standards and regulations.

Taking into account critical modern concerns, this handbook provides the latest information on:

- the use of RFID in ticketing and electronic passports;
- the security of RFID systems, explaining attacks on RFID systems and other security matters, such as transponder emulation and cloning, defence using cryptographic methods, and electronic article surveillance;
- frequency ranges and radio licensing regulations.

The text explores schematic circuits of simple transponders and readers, and includes new material on active and passive transponders, ISO/IEC 18000 family, ISO/IEC 15691 and 15692. It also describes the technical limits of RFID systems.

A unique resource offering a complete overview of the large and varied world of RFID, Klaus Finkenzeller's volume is useful for end-users of the technology as well as practitioners in auto ID and IT designers of RFID products. Computer and electronics engineers in security system development, microchip designers, and materials handling specialists benefit from this book, as do automation, industrial and transport engineers. Clear and thorough explanations also make this an excellent introduction to the topic for graduate level students in electronics and industrial engineering design.

Klaus Finkenzeller was awarded the *Fraunhofer-Smart Card Prize 2008* for the second edition of this publication, which was celebrated for being an outstanding contribution to the smart card field.

From reader reviews:

Kathie Richmond:

This RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication are generally reliable for you who want to be described as a successful person, why. The reason of this RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication can be on the list of great books you must have will be giving you more than just simple reading through food but feed an individual with information that perhaps will shock your preceding knowledge. This book is definitely handy, you can bring it almost everywhere and whenever your conditions throughout the e-book and printed people. Beside that this RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication giving you an enormous of experience such as rich vocabulary, giving you test of critical thinking that we all know it useful in your day pastime. So , let's have it appreciate reading.

Hazel Park:

Spent a free time and energy to be fun activity to complete! A lot of people spent their free time with their family, or all their friends. Usually they accomplishing activity like watching television, likely to beach, or picnic inside park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Could be reading a book can be option to fill your free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try look for book, may be the publication untitled RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication can be very good book to read. May be it could be best activity to you.

Dennis Haney:

Reading a book to become new life style in this season; every people loves to learn a book. When you read a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you would like get information about your review, you can read education books, but if you want to entertain yourself read a fiction books, these us novel, comics, along with soon. The RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication offer you a new experience in reading a book.

Sandra Bland:

You can find this RFID Handbook: Fundamentals and Applications in Contactless Smart Cards, Radio Frequency Identification and Near-Field Communication by go to the bookstore or Mall. Simply viewing or reviewing it could possibly to be your solve trouble if you get difficulties for the knowledge. Kinds of this e-

book are various. Not only through written or printed and also can you enjoy this book by means of e-book. In the modern era like now, you just looking by your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose proper ways for you.
