Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) Phillip Judson

This is currently the only book available on the development of knowledge-based, and related, expert systems in chemistry and toxicology. Written by a pioneer in the field, it shows how computers can work with qualitative information where precise numerical methods are not satisfactory. An underlying theme is the current concern in society about the conflicts between basing decisions on reasoned judgements and wanting precise decisions and measurable effectiveness. As well as explaining how the computer programs work, the book provides insights into how personal and political factors influence scientific progress. The introduction of regulations such as REACH in Europe and modifications to UN and OECD Guidelines on assessment of chemical hazard mean that the use of toxicity prediction is at a turning point. They put a heavy burden on the chemical industry but, for the first time, allow for the use of computer prediction to support or replace in vivo and in vitro experiments. There is increasing recognition among scientists and regulators that qualitative computer methods have much to offer and that in some circumstances they may be more reliable and informative than quantitative methods. This excellent introduction to a field where employment opportunities are growing is aimed at students, scientists and academics with a knowledge of chemistry.

From reader reviews:

Ernest Ainsworth:

The book Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) make one feel enjoy for your spare time. You may use to make your capable far more increase. Book can being your best friend when you getting pressure or having big problem together with your subject. If you can make examining a book Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) being your habit, you can get far more advantages, like add your capable, increase your knowledge about several or all subjects. You can know everything if you like start and read a reserve Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series). Kinds of book are several. It means that, science e-book or encyclopedia or some others. So , how do you think about this reserve?

Jack Williams:

This Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) book is just not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is information inside this guide incredible fresh, you will get information which is getting deeper you actually read a lot of information you will get. That Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) without we recognize teach the one who examining it become critical in thinking and analyzing. Don't possibly be worry Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) can bring once you are and not make your handbag space or bookshelves' become full because you can have it with your lovely laptop even cellphone. This Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) having great arrangement in word as well as layout, so you will not sense uninterested in reading.

Brenda Seddon:

Hey guys, do you wants to finds a new book to read? May be the book with the subject Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) suitable to you? The book was written by popular writer in this era. The particular book untitled Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series)is the main one of several books that will everyone read now. This book was inspired many people in the world. When you read this publication you will enter the new dimension that you ever know ahead of. The author explained their strategy in the simple way, so all of people can easily to know the core of this book. This book will give you a wide range of information about this world now. To help you see the represented of the world within this book.

Kara Navarrete:

Reserve is one of source of knowledge. We can add our knowledge from it. Not only for students but in addition native or citizen want book to know the update information of year to be able to year. As we know those guides have many advantages. Beside we add our knowledge, can also bring us to around the world. By book Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series) we can have more advantage. Don't one to be creative people? To be creative person must choose to read a book. Simply choose the best book that suited with your aim. Don't be doubt to change your life by this book Knowledge-Based Expert Systems in Chemistry: Not Counting on Computers (RSC Theoretical and Computational Chemistry Series). You can more pleasing than now.
