## Obstructive Airway Diseases: Role of Lipid Mediators

Incidences of inflammatory airway diseases are on the rise across the world. Existing therapeutic options are ineffective, unsafe, and expensive, and severe cases are nonresponsive to conventional therapy. Therefore, it is imperative that research be undertaken to discover new treatment options. **Obstructive Airway Diseases: Role of Lipid Mediators** discusses clinically successful and potential lipid targets that can make a difference in treating some of the most intractable disease states.

Topics discussed include:

- Obstructive airway diseases, etiology, pathophysiology, and existing therapeutic options
- What constitutes a lipid and how it is broken down to generate biologically active mediators
- The role of enzymes in the process of lipid mediator synthesis
- The biology of arachidonic acid, platelet-activating factor, and lysophosphatidic acid and the role they play in airway inflammation
- Products of arachidonic acid metabolism such as leukotrienes, prostaglandins, eicosatrienoic acid, and oxoicosatetraenoic acid
- Proresolutive lipid mediators in inflammatory airway disease conditions
- The role of sphingosine and ceramide in inflammatory airway disease
- Protein kinases activated by lipid mediators and those that trigger the generation of lipid messengers

The combined input of a panel of international authorities on lipid mediators makes this volume a valuable resource for all those involved in researching, teaching, and studying airway inflammation as well as those involved in drug discovery research.

Punit Srivastava maintains a blog with additional information about the book and his work.

### From reader reviews:

#### Francisco Gentry:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite book and reading a guide. Beside you can solve your condition; you can add your knowledge by the publication entitled Obstructive Airway Diseases: Role of Lipid Mediators. Try to make the book Obstructive Airway Diseases: Role of Lipid Mediators as your friend. It means that it can to become your friend when you truly feel alone and beside associated with course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you a lot more confidence because you can know every little thing by the book. So , let me make new experience along with knowledge with this book.

#### David Russell:

Information is provisions for those to get better life, information today can get by anyone in everywhere. The information can be a know-how or any news even restricted. What people must be consider if those information which is inside former life are challenging to be find than now's taking seriously which one is suitable to believe or which one often the resource are convinced. If you have the unstable resource then you buy it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Obstructive Airway Diseases: Role of Lipid Mediators as the daily resource information.

#### Harry Anderson:

Spent a free time and energy to be fun activity to perform! A lot of people spent their spare time with their family, or their own friends. Usually they accomplishing activity like watching television, going to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could be reading a book is usually option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try look for book, may be the publication untitled Obstructive Airway Diseases: Role of Lipid Mediators can be very good book to read. May be it is usually best activity to you.

#### Charles Edwards:

Do you really one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try and pick one book that you just dont know the inside because don't judge book by its deal with may doesn't work the following is difficult job because you are frightened that the inside maybe not as fantastic as in the outside seem likes. Maybe you answer may be Obstructive Airway Diseases: Role of Lipid Mediators why because the great cover that make you consider about the content will not disappoint you actually. The inside or content is definitely fantastic as the outside or maybe cover. Your reading 6th sense will directly guide you to pick up this book.
