Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) A. Townsend Peterson, Jorge Soberón, Richard G. Pearson, Robert P. Anderson, Enrique Martínez-Meyer, Miguel Nakamura, Miguel B. Araújo

This book provides a first synthetic view of an emerging area of ecology and biogeography, linking individual- and population-level processes to geographic distributions and biodiversity patterns. Problems in evolutionary ecology, macroecology, and biogeography are illuminated by this integrative view. The book focuses on correlative approaches known as ecological niche modeling, species distribution modeling, or habitat suitability modeling, which use associations between known occurrences of species and environmental variables to identify environmental conditions under which populations can be maintained. The spatial distribution of environments suitable for the species can then be estimated: a potential distribution for the species. This approach has broad applicability to ecology, evolution, biogeography, and conservation biology, as well as to understanding the geographic potential of invasive species and infectious diseases, and the biological implications of climate change.

The authors lay out conceptual foundations and general principles for understanding and interpreting species distributions with respect to geography and environment. Focus is on development of niche models. While serving as a guide for students and researchers, the book also provides a theoretical framework to support future progress in the field.

From reader reviews:

Kathie Richmond:

What do you concentrate on book? It is just for students because they are still students or this for all people in the world, what best subject for that? Simply you can be answered for that issue above. Every person has various personality and hobby for each and every other. Don't to be pressured someone or something that they don't would like do that. You must know how great as well as important the book Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology). All type of book can you see on many methods. You can look for the internet options or other social media.

Florence Nguyen:

What do you regarding book? It is not important along with you? Or just adding material when you need something to explain what the ones you have problem? How about your time? Or are you busy particular person? If you don't have spare time to do others business, it is make one feel bored faster. And you have free time? What did you do? All people has many questions above. They need to answer that question because just their can do in which. It said that about guide. Book is familiar in each person. Yes, it is proper. Because start from on pre-school until university need this particular Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) to read.

Aaron Tolleson:

Is it you actually who having spare time subsequently spend it whole day by means of watching television programs or just resting on the bed? Do you need something new? This Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) can be the respond to, oh how comes? A fresh book you know. You are therefore out of date, spending your time by reading in this brand new era is common not a nerd activity. So what these guides have than the others?

Tammy Paradis:

Some individuals said that they feel bored when they reading a reserve. They are directly felt this when they get a half parts of the book. You can choose the actual book Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) to make your personal reading is interesting. Your own skill of reading proficiency is developing when you like reading. Try to choose straightforward book to make you enjoy you just read it and mingle the opinion about book and examining especially. It is to be 1st opinion for you to like to start a book and study it. Beside that the e-book Ecological Niches and Geographic Distributions (MPB-49) (Monographs in Population Biology) can to be your brand new friend when you're experience alone and confuse with the information must you're doing of the time.
